

Styrket Indsats: Overview of Challenges

The overview of causalities is a visualization of how the 14 participating residential institutions experience the issues concerning institutionalized children. It is based on own reflections and interviews with children and young people, parents and other parties, such as teachers and case-workers.

The green points are the results from a debate on the management model with organizations that represent residential institutions, relevant workers unions, the child perspective, governmental leadership, research, the ministry of education and social affairs.
